EB07667 - Goat Anti-ACOX2 (Human) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ACOX2, acyl-Coenzyme A oxidase 2, branched chain, BCOX, BRCACOX, BRCOX, THCCox, Peroxisomal branched chain acyl-CoA oxidase,

THCA-CoA oxidase, Trihydroxycoprostanoyl-CoA oxidase

Official Symbol: ACOX2

Accession Number(s): NP_003491.1

Human GeneID(s): 8309

Immunogen

Peptide with sequence C-QWAQKSPTNTQENP, from the internal region (near the C Terminus) of the protein sequence according to NP_003491.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Approx 75kDa band observed in Human Liver lysates (calculated MW of 76.8kDa according to NP_003491.1). Recommended concentration: 0.5-1.5μg/ml. An additional band of 37kDa was consistently observed, however this band was not blocked by the immunizing peptide and it is therefore a non-specific signal. We call for caution when used for other assays than Western blot.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB07667 (0.5μg/ml) staining of Human Liver lysate (35μg protein in RIPA buffer) with (B) and without (A) blocking with the immunising peptide. Primary incubation was 1 hour. Detected by chemiluminescence.
