EB07991 - Goat Anti-Acylglycerol kinase Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: acylglycerol kinase, FLJ10842, MULK, multi-substrate lipid kinase, multiple substrate lipid kinase, AGK

Official Symbol: AGK

Accession Number(s): NP_060708.1

Human GeneID(s): [55750](#)

Non-Human GeneID(s): 69923 (mouse)

Immunogen

Peptide with sequence CDPKREQMLTSP, from the C Terminus of the protein sequence according to NP_060708.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Approx 50kDa band observed in Human Brain (Substantia nigra, Hippocampus) lysates (calculated MW of 47.1kDa according to NP_060708.1). Recommended concentration: 1-3µg/ml. An additional band of unknown identity was also consistently observed at 22kDa. This band was successfully blocked by incubation with the immunising peptide. We would appreciate any feedback from people in the field - have any such results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Mouse

EB07991 (1 μ g/ml) staining of Human Brain (Substantia nigra) lysate (35 μ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
