EB08465 - Goat Anti-ADAM23 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ADAM23, ADAM metallopeptidase domain 23, MDC3, a disintegrin and metalloproteinase domain 23

Official Symbol: ADAM23

Accession Number(s): NP_003803.1

Human GeneID(s): [8745](#)

Immunogen

Peptide with sequence NGKPQYSKGGEHC, from the internal region of the protein sequence according to NP_003803.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Preliminary experiments gave an approx 70kDa band in Human Brain (Cerebellum and Frontal Cortex) lysates after 0.7µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe. The precursor of this glycoprotein has a calculated size of 91.9kDa according to NP_003803.1. The 70kDa band was successfully blocked by incubation with the immunizing peptide.

Species Reactivity

Tested:

Expected from sequence similarity: Human
