# EB08523 - Goat Anti-BMP3 Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

Principal Names: BMP3, bone morphogenetic protein 3 (osteogenic), BMP-3A, bone

morphogenetic protein 3, bone morphogenetic protein-3, osteogenin

Official Symbol: BMP3

Accession Number(s): NP\_001192.2

Human GeneID(s): 651

#### **Immunogen**

Peptide with sequence C-GHRNFPTGTV PKWDSH, from the internal region of the protein sequence according to NP\_001192.2.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

#### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:8000.

Western blot: Preliminary experiments gave an approx 29kDa band in Human Bone Marrow lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 53.4kDa according to NP\_001192.2. The 29kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

#### **Species Reactivity**

Tested:

Expected from sequence similarity: Human
