EB11715 - Goat Anti-CBX7 (aa88-99) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: CBX7, chromobox homolog 7, chromobox protein homolog 7

Official Symbol: CBX7

Accession Number(s): NP_783640.1

Human GenelD(s): 23492

Immunogen

Peptide with sequence C-DLRSSHKAKGKE, from the internal region of the protein sequence according to NP_783640.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Preliminary experiments gave an approx 23kDa band in lysates of cell lines A549, CACO2, MCF7 and MRC5 PD19 after 0.01µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 28.3kDa according to NP_783640.1. The 23kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Dog, Pig, Cow
