# EB12680 - Goat Anti-CENPE (aa2363-2374) Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

**Principal Names:** CENPE, centromere protein E, 312kDa, CENP-E, KIF10, PPP1R61, Centromere autoantigen E (312kD), centromere-associated protein E, kinesin family member 10, kinesin-related protein CENPE, protein phosphatase 1, regulatory subunit 61 **Official Symbol:** CENPE

Accession Number(s): NP\_001804.2; NP\_001273663.1 Human GeneID(s): <u>1062</u>

**Important Comments:** This antibody is expected to recognize both reported isoforms (NP\_001804.2; NP\_001273663.1).

#### Immunogen

Peptide with sequence C-TQDNKNPHVTSR, from the internal region of the protein sequence according to NP\_001804.2; NP\_001273663.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

# **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:128000.

**Western blot:** Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as large as the calculated size of 316kDa according to NP\_001804.2. Therefore we cannot recommend an optimal concentration and the antibody is an aspiring product. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

Tested: Expected from sequence similarity: Human
