## EB08687 - Goat Anti-DUBA Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** OTUD5, OTU domain containing 5, DKFZp761A052, DUBA, MGC104871

**Official Symbol:** OTUD5

**Accession Number(s):** NP\_060072.1; NP\_001129629.1; NP\_001129631.1

**Human GeneID(s):** [55593](#)

**Non-Human GeneID(s):** 54644 (mouse), 363452 (rat)

**Important Comments:** This antibody is expected to recognize reported isoforms NP\_060072.1; NP\_001129629.1 and NP\_001129631.1.

### Immunogen

Peptide with sequence C-RQVRGPSQPRKAS, from the internal region of the protein sequence according to NP\_060072.1; NP\_001129629.1; NP\_001129631.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:64000.

**Western blot:** Preliminary experiments gave an approx 80kDa band in lysates of cell lines Jurkat and MOLT4 after 0.2µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 60.6kDa according to NP\_060072.1. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat, Cow
