EB08687 - Goat Anti-DUBA Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: OTUD5, OTU domain containing 5, DKFZp761A052, DUBA,

MGC104871

Official Symbol: OTUD5

Accession Number(s): NP_060072.1; NP_001129629.1; NP_001129631.1

Human GeneID(s): 55593

Non-Human GenelD(s): 54644 (mouse), 363452 (rat)

Important Comments: This antibody is expected to recognize reported isoforms

NP_060072.1; NP_001129629.1 and NP_001129631.1.

Immunogen

Peptide with sequence C-RQVRGPSQPRKAS, from the internal region of the protein sequence according to NP_060072.1; NP_001129629.1; NP_001129631.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: Preliminary experiments gave an approx 80kDa band in lysates of cell lines Jurkat and MOLT4 after 0.2μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 60.6kDa according to NP_060072.1. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Cow
