EB07515 - Goat Anti-Fibrillin 2 (mouse) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: Fbn2, fibrillin 2, BC063774, Fib-2, KIAA4226, mKIAA4226, sne, sy, syndatyly ems

Official Symbol: Fbn2

Accession Number(s): NP_034311.1

Non-Human GeneID(s): 14119 (mouse)

Immunogen

Peptide with sequence C-KELRKLEEHNEDD, from the internal region (near the C Terminus) of the protein sequence according to NP_034311.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:2000.

Western blot: Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as large as the calculated size of 314kDa according to NP_034311.1. Therefore we cannot recommend an optimal concentration and the product is investigative grade. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Mouse
