# EB08094 - Goat Anti-Formyl Peptide Receptor-like 2 Antibody

Size: 100µg specific antibody in 200µl

# **Target Protein**

Principal Names: FPRL2, formyl peptide receptor-like 2, FML2\_HUMAN, FMLPY,

FPRH1, FPRH2, RMLP-R-I, FMLP-related receptor II

Official Symbol: FPRL2

Accession Number(s): NP\_002021.3

Human GeneID(s): 2359

## **Immunogen**

Peptide with sequence C-DSAQTSNTDTTS, from the C Terminus of the protein sequence according to NP\_002021.3.

Please note the peptide is available for sale.

# **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:1000.

Western blot: Preliminary experiments gave an approx 55kDa band in Human Lymph Node lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 40.0kDa according to NP\_002021.3. However, we do note that the protein is a glycoprotein. The 55kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates?

## **Species Reactivity**

Tested:

Expected from sequence similarity: Human
