# EB12198 - Goat Anti-FOXF1 (aa316-330) Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

Principal Names: FOXF1, forkhead box F1, ACDMPV, FKHL5, FREAC1, FREAC-1, Forkhead, drosophila, homolog-like 5, forkhead box protein F1, forkhead-related activator 1, forkhead-related protein FKHL5, forkhead-related transcription factor 1 Official Symbol: FOXF1 Accession Number(s): NP\_001442.2 Human GeneID(s): <u>2294</u>

#### Immunogen

Peptide with sequence C-QNSHNAPAELQGIPR, from the internal region of the protein sequence according to NP\_001442.2.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

# **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:128000.

**Western blot:** Preliminary experiments gave an approx 48kDa band in lysates of cell line MRC5 PD19 after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 40.1kDa according to NP\_001442.2. The 48kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

## **Species Reactivity**

Tested: Expected from sequence similarity: Human
