# EB09096 - Goat Anti-GABRB2 Antibody

Size: 100µg specific antibody in 200µl

#### **Target Protein**

Principal Names: GABRB2, gamma-aminobutyric acid (GABA) A receptor, beta 2,

MGC119386, MGC119388, MGC119389, OTTHUMP00000160872

Official Symbol: GABRB2

Accession Number(s): NP\_068711.1; NP\_000804.1

Human GeneID(s): 2561

Non-Human GenelD(s): 14401 (mouse), 25451 (rat)

Important Comments: This antibody is expected to recognize both reported isoforms

(NP\_068711.1; NP\_000804.1).

### Immunogen

Peptide with sequence C-HSFGRNALERHVAQ, from the internal region of the protein sequence according to NP\_068711.1; NP\_000804.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

# **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Preliminary experiments gave an approx 80kDa band in Mouse Brain lysates after  $0.2\ \mu\text{g/ml}$  antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 59.2kDa according to Human NP\_068711.1 and 54.6kDa according to Mouse NP\_032096.1. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
