EB11949 - Goat Anti-IGFBP1 (aa156-170) Antibody 🏹

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: IGFBP1, insulin-like growth factor binding protein 1, AFBP, IBP1, IGF-BP25, PP12, hIGFBP-1, IBP-1, IGF-binding protein 1, IGFBP-1, OTTHUMP00000159561, OTTHUMP00000207990, OTTHUMP00000214348, alpha-pregnancy-associated endometrial globulin, amniotic fluid binding protein, binding protein-25, binding protein-26, binding protein-28, growth hormone independent-binding protein, insulin-like growth factor-binding protein 1, placental protein 12 Official Symbol: IGFBP1 Accession Number(s): NP_000587.1 Human GeneID(s): <u>3484</u>

Immunogen

Peptide with sequence C-STYDGSKALHVTNIK, from the internal region of the protein sequence according to NP_000587.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

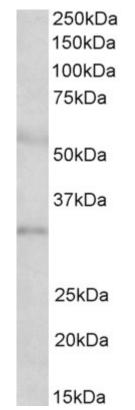

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

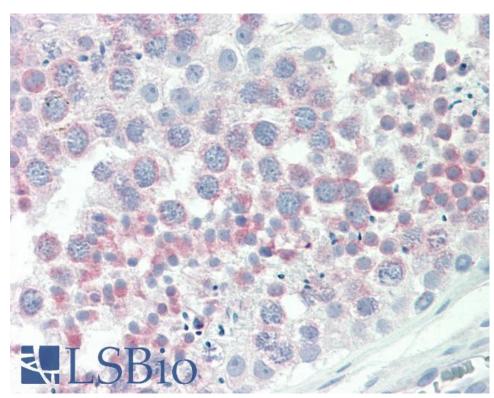

Western blot: Approx 30kDa band observed in Human Placenta lysates (calculated MW of 27.9kDa according to NP_000587.1). Recommended concentration: 1-3µg/ml. An additional band of 55kDa was consistently observed, however this band was not blocked by the immunizing peptide and it is therefore a non-specific signal. **IHC:** Paraffin embedded Human Testis. Recommended concentration: 10µg/ml.

Species Reactivity

Tested: Human Expected from sequence similarity: Human

EB11949 (2µg/ml) staining of Human Placenta lysate (35µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

EB11949 (10µg/ml) staining of paraffin embedded Human Testis. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
