Research Use Only. Not for diagnostic or therapeutic use.

Storage: For long-term storage keep aliquots at -20°C. (Store no longer than 12 months at 4°C). Minimize freezing and thawing.

EB06692 - Goat Anti-LGR7 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: relaxin family peptide receptor 1, RXFP1, MGC142177, MGC138347, LGR7.2, LGR7.10, LGR7.1, relaxin/insulin-like family peptide receptor 1, RXFP1, leucine-rich repeat-containing G protein-coupled receptor 7, Relaxin Receptor 1, LGR7

Official Symbol: RXFP1

Accession Number(s): NP_067647.2

Human GeneID(s): [59350](#)

Immunogen

Peptide with sequence CEMSLISQSTRLNSYS, from the C Terminus of the protein sequence according to NP_067647.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Preliminary experiments gave bands at approx 100kDa and 35kDa in Human Colon and Heart lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the bands we observe given the calculated size of 87kDa according to NP_067647.1. Both detected bands were successfully blocked by incubation with the immunizing peptide (and BLAST results with the immunizing peptide sequence did not identify any other proteins to explain the additional bands). We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Dog
