# EB09643 - Goat Anti-LNP1 Antibody

Size: 100µg specific antibody in 200µl

# **Target Protein**

Principal Names: LNP1, leukemia NUP98 fusion partner 1 Official Symbol: LNP1 Accession Number(s): NP\_001078920.1 Human GenelD(s): <u>348801</u>

#### Immunogen

Peptide with sequence SSDCHPRRHSHEDQ, from the internal region of the protein sequence according to NP\_001078920.1.

Please note the peptide is available for sale.

### **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

# **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:128000.

**Western blot:** Preliminary experiments gave an approx 50kDa band in Human Kidney, Liver and Lung lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 21.3kDa according to NP\_001078920.1. The 50kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

Tested:

Expected from sequence similarity: Human, Dog, Cow
