# EB09950 - Goat Anti-MDFI Antibody

Size: 100µg specific antibody in 200µl

**Target Protein** 

Principal Names: I-MF, I-mfa, inhibitor of MyoD family a, MyoD family inhibitor,

OTTHUMP00000196414, MDFI

Official Symbol: MDFI

Accession Number(s): NP\_005577.1

Human GeneID(s): 4188

### **Immunogen**

Peptide with sequence YQVSGQRPSGCD, from the N Terminus of the protein sequence according to NP\_005577.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Preliminary experiments gave an approx 20kDa band in Human Skeletal Muscle lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 25.0kDa according to NP\_005577.1. The 20kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

Tested:

Expected from sequence similarity: Human
