Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as large as the calculated size of 299kDa according to NP_034974.1. Therefore we cannot recommend an optimal concentration and the antibody is an aspiring product.

IHC: A customer reported that this antibody stained cilia in mouse bronchi and it co-stained with lectin (membrane).

Species Reactivity

Tested: Expected from sequence similarity: Mouse
