EB10312 - Goat Anti-Muc5b (mouse) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: 2300002I04Rik, A130042M24, AV085033, MUC5, MUC9, mucin 5, subtype B, tracheobronchial, mucin 5b, Muc5b

Official Symbol: Muc5b

Accession Number(s): NP_083077.2

Non-Human GeneID(s): 74180 (mouse), 309114 (rat)

Immunogen

Peptide with sequence CEKEDSSTCQ, from the internal region of the protein sequence according to NP_083077.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Preliminary experiments gave bands at approx 100kDa and 55kDa in Mouse Lung lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the bands we observe given the calculated size of 515kDa according to Mouse NP_083077.2. Both detected bands were successfully blocked by incubation with the immunizing peptide (and BLAST results with the immunizing peptide sequence did not identify any other proteins to explain the additional bands). We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Mouse, Rat
