# EB10616 - Goat Anti-Mucin 10 / Prol1 Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

Principal Names: Prol1, proline rich, lacrimal 1, Muc10, mucin 10, mucin 10, submandibular gland salivary mucin Official Symbol: Prol1 Accession Number(s): NP\_032670.2 Non-Human GenelD(s): 17830 (mouse)

#### Immunogen

Peptide with sequence C-PKRQIISDKTKP, from the internal region of the protein sequence according to NP\_032670.2.

Please note the peptide is available for sale.

# **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

# **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:8000.

**Western blot:** Preliminary experiments gave an approx 48kDa band in Mouse Eye lysates after 2µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 33.6kDa according to NP\_032670.2. The 48kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

#### **Species Reactivity**

Tested: Expected from sequence similarity: Mouse
