EB11107 - Goat Anti-NaV1.7 (aa1874-1887) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ETHA, FEB3B, hNE-Na, Nav1.7, NENA, NE-NA, neuroendocrine sodium channel, OTTHUMP00000204933, OTTHUMP00000204936, peripheral sodium channel 1, PN1, sodium channel protein type 9 subunit alpha, sodium channel protein type IX subunit alpha, sodium channel, voltage-gated, type IX, alpha polypeptide, sodium channel, voltage-gated, type IX, alpha subunit, voltage-gated sodium channel alpha subunit Nav1.7, voltage-gated sodium channel subunit alpha Nav1.7, SCN9A

Official Symbol: SCN9A

Accession Number(s): NP_002968.1; NP_001352465.1

Human GeneID(s): 6335

Non-Human GenelD(s): 20274 (mouse), 78956 (rat)

Immunogen

Peptide with sequence C-KRKQEDVSATVIQR, from the internal region (near C Terminus) of the protein sequence according to NP_002968.1; NP_001352465.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: Preliminary experiments gave an approx 80kDa band in Human Brain (Cerebellum), Mouse brain and Rat Ovary lysates after 0.1μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 225kDa according to NP_002968.1. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Cow
