EB10399 - Goat Anti-NRAP Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: nebulin-related anchoring protein, NRAP

Official Symbol: NRAP

Accession Number(s): NP_006166.3; NP_932326.2

Human GeneID(s): [4892](#)

Non-Human GeneID(s): 18175 (mouse), 307982 (rat)

Important Comments: This antibody is expected to recognize both reported isoforms (NP_006166.3; NP_932326.2).

Immunogen

Peptide with sequence C-DFAKRSRSQFH, from the internal region of the protein sequence according to NP_006166.3; NP_932326.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Preliminary experiments gave an approx 100kDa band in Human, Mouse and Rat Heart lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 193kDa according to NP_006166.3. The 100kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow, Pig
