EB10621 - Goat Anti-parotid secretory protein (mouse aa146-160) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: Psp, parotid secretory protein, OTTMUSP00000018314, OTTMUSP00000036473, Bpifa2e

Official Symbol: Bpifa2

Accession Number(s): NP_032979.1

Non-Human GeneID(s): 19194 (mouse)

Immunogen

Peptide with sequence C-KTNAQTGLPEVTIGK, from the internal region of the protein sequence according to NP_032979.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Approx 25kDa band observed in Mouse mandibular glands from E17 onwards (calculated MW of 24.8kDa according to NP_032979.1). Recommended concentration: 1-3µg/ml. Data provided by Everest Grant winner Melinda Larsen, State University of New York, Albany, NY. This antibody has been successfully used in WB on Mouse, PMID: 32390232.

Immunocytochemistry: A subset of murine submandibular gland cells (E18) show specific staining in secretory granules. Recommended concentration 4µg/ml. Data provided by Everest Grant winner Melinda Larsen, State University of New York, Albany, NY.

Species Reactivity

Tested: Mouse

Expected from sequence similarity: Mouse

Specific References
