EB08243 - Goat Anti-PGBD2 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: PGBD2, piggyBac transposable element derived 2, hypothetical protein

LOC267002

Official Symbol: PGBD2

Accession Number(s): NP_001017434.1; NP_733843.1

Human GenelD(s): 267002

Important Comments: This antibody is expected to recognise both reported isoforms

(NP_001017434.1; NP_733843.1)

Immunogen

Peptide with sequence C-ESNADTTSQGRRSRR, from the internal region of the protein sequence according to NP_001017434.1; NP_733843.1 .

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx 30kDa band in Human Brain (Cerebral Cortex) lysates after 0.3μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 39.6kDa according to NP_001017434.1 and of 68.0kDa according to NP_733843.1. The 30kDa band was successfully blocked by incubation with the immunizing peptide.

Species Reactivity

Tested:

Expected from sequence similarity: Human
