Research Use Only. Not for diagnostic or therapeutic use.

Storage: For long-term storage keep aliquots at -20°C. (Store no longer than 12 months at 4°C). Minimize freezing and thawing.

EB07248 - Goat Anti-Prealbumin / Transthyretin Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: transthyretin, prealbumin, TBPA, PALB, HsT2651, HGNC:12405, transthyretin (prealbumin, amyloidosis type I), TTR

Official Symbol: TTR

Accession Number(s): NP_000362.1

Human GeneID(s): [7276](#)

Non-Human GeneID(s): 22139 (mouse), 24856 (rat)

Immunogen

Peptide with sequence C-YKVEIDTKSYWK, from the internal region of the protein sequence according to NP_000362.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:1000.

Western blot: Preliminary experiments gave an approx 20-22kDa band in Human Heart, Kidney, Liver, Lung, Placenta and Testis lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 15.9kDa according to NP_000362.1. The 20-22kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog
