# EB09191 - Goat Anti-SLC47A1 Antibody

Size: 100µg specific antibody in 200µl

# **Target Protein**

Principal Names: SLC47A1, solute carrier family 47, member 1, FLJ10847, MATE1,

MGC64822, multidrug and toxin extrusion 1

Official Symbol: SLC47A1

Accession Number(s): NP\_060712.2

Human GeneID(s): 55244

## **Immunogen**

Peptide with sequence C-PEHPQDGAKLSRKQ, from the internal region (near C Terminus) of the protein sequence according to NP\_060712.2.

Please note the peptide is available for sale.

# **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:64000.

**Western blot:** Approx. 60-65kDa band observed in Human Liver lysates (calculated MW of 61.9kDa according to NP\_060712.2). This band was successfully blocked by incubation with the immunizing peptide. Recommended concentration: 0.1-0.3µg/ml. Primary incubation 1 hour at room temperature.

**Immunofluorescence:** Strong expression of the protein seen in the plasma membrane of HepG2 cells. Recommened concentration: 10µg/ml.

# **Species Reactivity**

Tested: Human

Expected from sequence similarity: Human

EB09191 Immunofluorescence analysis of paraformaldehyde fixed HepG2 cells, permeabilized with 0.15% Triton. Primary incubation 1hr (10ug/ml) followed by Alexa Fluor 488 secondary antibody (2ug/ml), showing membrane staining. The nuclear stain is DAPI (blue). Negative control: Unimmunized goat IgG (10ug/ml) followed by Alexa Fluor 488 secondary antibody (2ug/ml).

EB09191 (0.1 $\mu$ g/ml) staining of Human Liver lysate (35 $\mu$ g protein in RIPA buffer). Detected by chemiluminescence.
