EB11311 - Goat Anti-SLC6A3 / DAT Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: DA transporter, DAT, DAT1, sodium-dependent dopamine transporter, solute carrier family 6 (neurotransmitter transporter, dopamine), member 3, solute carrier family 6 member 3, SLC6A3

Official Symbol: SLC6A3

Accession Number(s): NP_001035.1

Human GeneID(s): [6531](#)

Immunogen

Peptide with sequence C-QLTSSTLTNPRQSP, from the internal region (near N Terminus) of the protein sequence according to NP_001035.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Approx 85kDa band observed in Human Brain (Substantia nigra) lysates (calculated MW of 68.5kDa according to NP_001035.1). The observed molecular weight corresponds to earlier findings in literature with different antibodies (Mazei-Robison et al, J Neurosci. 2008 Jul 9;28(28):7040-6. PMID: 18614672).. Recommended concentration: 1-3µg/ml. Primary incubation was 1 hour.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB11311 (1 μ g/ml) staining of Human Substantia nigra lysate (35 μ g protein in RIPA buffer). Detected by chemiluminescence.
