## EB09198 - Goat Anti-THBS3 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** THBS3, thrombospondin 3, MGC119564, MGC119565, TSP3, OTTHUMP00000033827

**Official Symbol:** THBS3

**Accession Number(s):** NP\_009043.1

**Human GeneID(s):** [7059](#)

**Non-Human GeneID(s):** 21827 (mouse)

### Immunogen

Peptide with sequence CNDTVPEDFEPFRRQ, from the C Terminus of the protein sequence according to NP\_009043.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:32000.

**Western blot:** Preliminary experiments gave an approx 50kDa band in Human Lung and in lysates of cell line A549 after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 104kDa according to NP\_009043.1. The 50kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

**IHC:** In paraffin embedded Human Colon shows endothelial cell staining of a blood vessel. Recommended concentration, 1-2µg/ml.

### Species Reactivity

**Tested:** Human

**Expected from sequence similarity:** Human, Mouse, Dog, Cow, Pig

EB09190 5µg/ml) staining of paraffin embedded Human Colon. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
