EB12618 - Goat Anti-VASP (aa282-295) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: VASP, vasodilator-stimulated phosphoprotein

Official Symbol: VASP

Accession Number(s): NP_003361.1

Human GeneID(s): [7408](#)

Important Comments: This antibody is expected to recognize.

Immunogen

Peptide with sequence C-EKTPKDESANQEELP, from the internal region of the protein sequence according to NP_003361.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:1000.

Western blot: Approx 50kDa band observed in Human Platelets lysates (calculated MW of 39.8kDa according to NP_003361.1). The observed molecular weight corresponds to earlier findings in literature with different antibodies (Reinhard et al, EMBO J. 1992 Jun;11(6):2063-70. PMID: 1318192). Recommended concentration: 0.1-0.3µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB12618 (0.1µg/ml) staining of Human Platelets lysate (35µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
