EB11491 - Goat Anti-WDR9 / BRWD1 (aa2137-2151) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: bromodomain and WD repeat domain containing 1, bromodomain and WD repeat-containing protein 1, BRWD1, C21orf107, FLJ43918, N143, OTTHUMP00000068796, OTTHUMP00000068797, OTTHUMP00000068928, OTTHUMP00000207967, transcriptional unit N143, WD repeat protein WDR9-form2, WD repeat-containing protein 9, WDR9

Official Symbol: BRWD1

Accession Number(s): NP_061836.2; NP_387505.1; NP_001007247.1

Human GeneID(s): [54014](#)

Important Comments: This antibody is expected to recognize reported isoforms A and B (NP_061836.2; NP_387505.1).

Immunogen

Peptide with sequence C-NVKISETTGNSKFRP, from the internal region (near C Terminus) of the protein sequence according to NP_061836.2; NP_387505.1; NP_001007247.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Preliminary experiments gave an approx 100kDa band in Human Heart and Skeletal Muscle lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 263kDa according to NP_061836.2. The 100kDa band was successfully blocked by incubation with the immunizing peptide. We found identical results with an antibody generated to a different part of the protein (EB11490).

Species Reactivity

Tested:

Expected from sequence similarity: Human
