Since 2000, Everest Biotech has been designing a catalogue containing thousands of goat antibodies against a broad range of human, mouse and rat proteins of biomedical interest. Everest Biotech's commitment to quality and continuous improvement has been recognised with ISO 9001:2015 accreditation. Everest Biotech customers can be assured they will receive high quality products and excellent customer service.

First identified in Humans in the 1960's, coronaviruses are single-stranded positive sense, enveloped RNA viruses. Transmittable from animals, human coronaviruses can result in a range of respiratory symptoms. Since 2002 the most symptomatically severe human coronaviruses have included severe acute respiratory syndrome coronavirus (SARS-CoV) and the Middle East respiratory syndrome coronavirus (MERS-CoV); with the most recent coronavirus strain identified SARS-coronavirus 2 (SARS-CoV-2) resulting in the global pandemic coronavirus disease 2019 (COVID-19).
