

## GOAT ANTI-BRM ANTIBODY

SKU: EB08634

## SPECIFICATIONS

**Formulation** Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

**Unit Size** 100 µg

**Storage Instructions** Aliquot and store at -20°C. Minimize freezing and thawing.

**Synonym / Alias** SWI/SNF related, matrix associated, actin dependent regulator of chromatin, subfamily a, member 2|BAF190|BRM|FLJ36757|MGC74511|SNF2|SNF2L2|SNF2LA|SWI2|Sth1p|hBRM|hSNF2a|SNF2-alpha|SNF2-like 2|SNF2/SWI2-like protein 2|SWI/SNF-re

**Usage Summary** <strong>Immunofluorescence:</strong> Strong expression of the protein seen in the Nucleus and some staining in the Cytoplasm of HeLa and U251 cells. Recommended concentration: 10µg/ml.

**Accession ID** NP\_003061.3; NP\_620614.2

**Blocking Peptide** EBP08634

**Immunogen** Peptide with sequence C-PSNSQLEIEGNSS, from the internal region of the protein sequence according to NP\_003061.3; NP\_620614.2.

|                              |                                                                                                                                                                                                                                   |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Comments</b>      | This antibody is expected to recognise both reported isoforms (NP_003061.3; NP_620614.2)                                                                                                                                          |
| <b>Peptide Sequence</b>      | C-PSNSQLEIEGNSS                                                                                                                                                                                                                   |
| <b>Purification Method</b>   | Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.                                                                                             |
| <b>Shipping Instructions</b> | Refrigerated                                                                                                                                                                                                                      |
| <b>Predicted Species</b>     | Human, Rat                                                                                                                                                                                                                        |
| <b>Reactive Species</b>      | Human                                                                                                                                                                                                                             |
| <b>Human Gene ID</b>         | 6595                                                                                                                                                                                                                              |
| <b>Product Grade</b>         | <a href="https://prod-vector-labs-pimcore-assets.s3.us-east-1.amazonaws.com/assets/products/image/elite_medium.png">https://prod-vector-labs-pimcore-assets.s3.us-east-1.amazonaws.com/assets/products/image/elite_medium.png</a> |
| <b>ELISA Detection Limit</b> | Antibody detection limit dilution 1:1000.                                                                                                                                                                                         |
| <b>Application Type</b>      | Pep-ELISA, IF                                                                                                                                                                                                                     |
