Accession

NP 057735.2; NP 001072988.1

Blocking

Peptide

EBP06214

Peptide with sequence KPSPAGTAKELEP-C, from the N Terminus of the protein sequence according to Immunogen

NP 057735.2; NP 001072988.1.

Product Comments

This antibody is expected to recognise both reported isoforms.

Peptide

Sequence

KPSPAGTAKELEP-C

Purification Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using

Method the immunizing peptide.

Detection

Antibody detection limit dilution 1:64000.

Limit

Western Blot: Preliminary experiments gave an approx 28kDa band in human bone marrow lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we

Western **Blot**

observe given the calculated size of 90.2kDa according to NP 057735.2. The 28kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any

results been reported with other antibodies/lysates? Have any further splice variants/modified forms been

reported?
