ELISA Detection Limit Antibody detection limit dilution 1:128000.

Western Blot Approx 45kDa band observed in Mouse Brain lysates (calculated MW of 46.2kDa according to Mouse NP_032334.2). Recommended concentration: 1-3µg/ml. Additional bands of 75 and 18kDa of unknown identity were consistently observed. These bands were successfully blocked by incubation with the immunizing peptide. Primary incubation was 1 hour. Preliminary testing was unsuccessful on Rat Brain for this particular batch.

Application Type Pep-ELISA, WB
