

GOAT ANTI-HUMAN IGM ANTIBODY

SKU: EB2ND-50-3002

SPECIFICATIONS

Formulation	10 mM Tris, PH 8.2, with 150 mM NaCl, 10 mg/ml BSA and 0.1% sodium azide
Unit Size	500 µg
Storage	Store at 4°C for short durations. Store at -20°C for longer periods (> 1 month). Minimize freeze thaw cycles.
Instructions	Protein ELISA: Human serum IgM detection at 1: 200 dilution. Peptide ELISA: Antibody detection at 1:128000 dilution. Immunofluorescence: Immunofluorescence tested on Daudi cells.
Usage Summary	Recommended dilution: 1:50 to 1:100. Western blotting : Approx 75 kDa band observed human plasma and serum. Recommended concentration: 0.1-1 µg/ml. Please optimize dilutions for your particular assay conditions. Starting test dilution: 1:500 for indirect immunofluorescence.
Immunogen	a 42-aa long peptide from the heavy chain of human Immunoglobulin M (unconjugated).
Purification Method	Ammonium sulphate precipitation of serum followed by antigen affinity purification.
Shipping Instructions	Refrigerated
