Grade **ELISA** 

**Detection** 

Antibody detection limit dilution 1:128000.

Limit

Western

Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as large as the calculated size of 303kDa according to NP\_899099.2. Therefore we cannot recommend an optimal concentration and the antibody is an aspiring product. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been

reported?

**Application** 

Pep-ELISA
