ELISA

Detection Antibody detection limit dilution 1:2000.

Limit

Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as small as the

predicted size of approx. 7.5kDa according to NP_006533. Therefore we cannot recommend an optimal

Western

concentration and the product is investigative grade. We would appreciate any feedback from people in the field -Blot have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms

been reported?

Application

Pep-ELISA **Type**
