Preliminary experiments gave an approx 170kDa band in Human Testis lysates after 0.2µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 123kDa according to NP_694942.3. The 170kDa band was successfully blocked by

incubation with the immunizing peptide.

Application

Pep-ELISA, IHC Type
