ELISA

Detection

Antibody detection limit dilution 1:16000.

Limit

Approx 90kDa band observed in Human Placenta lysates (calculated MW of 89.5kDa according to NP_004496.1). Recommended concentration: 1-3µg/ml. An additional band of 50kDa was consistently

Western Blot

observed, however this band was not blocked by the immunizing peptide and it is therefore a non-specific signal. We call for caution when used for other assays than Western blot.

Application

Type

Pep-ELISA, WB
