# EB08700 - Goat Anti-ABCA6 Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

**Principal Names:** ABCA6, ATP-binding cassette, sub-family A (ABC1), member 6, EST155051, FLJ43498, ABC transporter ABCA6, ATP-binding cassette A6, ATP-binding

cassette, sub-family A, member 6

Official Symbol: ABCA6

Accession Number(s): NP\_525023.2

Human GeneID(s): 23460

#### **Immunogen**

Peptide with sequence C-RWKLLPHSDEP, from the C Terminus of the protein sequence according to NP\_525023.2.

Please note the <u>peptide</u> is available for sale.

# **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

**Western blot:** Preliminary experiments gave an approx 50kDa band in Human Brain (Cerebellum, Cerebral Cortex, Frontal Cortex) lysates after 0.5µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 184kDa according to NP\_525023.2. The 50kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

Tested:

Expected from sequence similarity: Human
