# EB05736 - Goat Anti-ABCB9 / TAPL Antibody

Size: 100µg specific antibody in 200µl

### **Target Protein**

Principal Names: ABCB9, ATP-binding cassette, sub-family B (MDR/TAP), member 9,

TAPL, KIAA1520, EST122234

Official Symbol: ABCB9

Accession Number(s): NP\_062570.1; NP\_062571.1; NP\_982269.1

Human GeneID(s): 23457

**Important Comments:** This antibody is expected to recognise both human isoforms of this protein (as represented by NP\_062570.1, NP\_062571.1 and NP\_982269.1). Variants (NP\_062571.1; NP\_982269.1) encode the same isoform.

### Immunogen

Peptide with sequence C-GHNEPVANGSHKA, from the C Terminus of the protein sequence according to NP\_062570.1; NP\_062571.1; NP\_982269.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:64000.

**Western blot:** Preliminary experiments gave no signal but low background in human brain and liver lysates at up to 1µg/ml. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates?

**IHC:** In paraffin embedded Human Testis shows vesiculate cytoplasm staining of primary spermatocytes. Recommended concentration, 3-5µg/ml.

### **Species Reactivity**

Tested: Human

Expected from sequence similarity: Human

EB05736 (3.8 $\mu$ g/ml) staining of paraffin embedded Human Testis. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
