EB08708 - Goat Anti-ABCD1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ABCD1, ATP-binding cassette, sub-family D (ALD), member 1, ABC42, ALD, ALDP, AMN, adrenoleukodystrophy protein

Official Symbol: ABCD1

Accession Number(s): NP_000024.2

Human GeneID(s): [215](#)

Immunogen

Peptide with sequence C-EDMQRKGYSEQD, from the internal region of the protein sequence according to NP_000024.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Preliminary experiments gave an approx. 50kDa band in Human Brain (Cerebellum) lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 82.9kDa according to NP_000024.2. The 50kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

HEK293 overexpressing human ABCD1 and probed with EB08708 at 1ug/ml (mock transfection in first lane).
