EB09644 - Goat Anti-ADAMTSL2 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ADAMTSL2, ADAMTS-like 2, FLJ45164, KIAA0605, OTTHUMP00000064620, OTTHUMP00000162492

Official Symbol: ADAMTSL2

Accession Number(s): NP_055509.2

Human GeneID(s): [9719](#)

Non-Human GeneID(s): 77794 (mouse), 311827 (rat)

Immunogen

Peptide with sequence CTHVTGNYRKGNH, from the internal region of the protein sequence according to NP_055509.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Preliminary experiments gave an approx 25kDa band in Human Kidney, Liver and Lung lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 105kDa according to NP_055509.2. The 25kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
