EB08492 - Goat Anti-Arylsulfatase H Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ARSH, arylsulfatase family, member H, sulfatase, arylsulfatase H

Official Symbol: ARSH

Accession Number(s): NP_001011719.1

Human GenelD(s): 347527

Immunogen

Peptide with sequence LSDCQASKTPEL, from the internal region of the protein sequence according to NP_001011719.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Preliminary experiments gave an approx 45kDa band in Human Kidney lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 63.5kDa according to NP_001011719.1. The 45kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Dog
