EB05006 - Goat Anti-BCL7A Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: BCL7A, BCL7, B-cell CLL/lymphoma 7A, B-cell CLL/lymphoma-7

Official Symbol: BCL7A

Accession Number(s): NP_066273.1; NP_001019979.1

Human GeneID(s): 605

Non-Human GeneID(s): 77045 (mouse)

Important Comments: This antibody is expected to recognize both reported isoforms

(NP_066273.1; NP_001019979.1).

Immunogen

Peptide with sequence C-MKLEASQQNSEEM, from the C Terminus of the protein sequence according to NP_066273.1; NP_001019979.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:4000.

Western blot: Approx 26kDa band observed in Human Lymph Node lysates (calculated MW of 25.0kDa according to NP_066273.1). Recommended concentration: 1-3μg/ml. Primary incubation 1 hour at room temperature.

Immunofluorescence: Strong expression of the protein seen in the nuclei of U2OS cells. Recommended concentration: 10µg/ml.

Flow Cytometry: Flow cytometric analysis of Daudi cells. Recommended concentration: 10ug/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow, Pig

EB05006 staining (1μg/ml) of Human Lymph Node lysate (35μg protein in RIPA buffer). Detected by chemiluminescence.

EB05006 Immunofluorescence analysis of paraformaldehyde fixed U2OS cells, permeabilized with 0.15% Triton. Primary incubation 1hr (10ug/ml) followed by Alexa Fluor 488 secondary antibody (2ug/ml), showing nuclear staining. Actin filaments were stained with phalloidin (red) and the nuclear stain is DAPI (blue). Negative control:

Unimmunized goat IgG (10ug/ml) followed by Alexa Fluor 488 secondary antibody (2ug/ml).

EB05006 Flow cytometric analysis of paraformaldehyde fixed Daudi cells (blue line), permeabilized with 0.5% Triton. Primary incubation 1hr (10ug/ml) followed by Alexa Fluor 488 secondary antibody (1ug/ml). IgG control:

Unimmunized goat IgG (black line) followed by Alexa Fluor 488 secondary antibody.
