## EB05650 - Goat Anti-BLU / ZMYND10 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** ZMYND10, zinc finger, MYND domain containing 10, BLU protein, BLU, FLU, zinc finger, MYND-type containing 10, zinc finger, MYND domain-containing 10

**Official Symbol:** ZMYND10

**Accession Number(s):** NP\_056980.2

**Human GeneID(s):** [51364](#)

**Non-Human GeneID(s):** 114602 (mouse)

### Immunogen

Peptide with sequence GKTCVLAAQGDRAK, from the C Terminus of the protein sequence according to NP\_056980.2.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:16000.

**Western blot:** Preliminary experiments gave an approx 75-80kDa band in A549 lysates at 1ug/ml, this band was successfully blocked by incubation with the immunising peptide.

Please note that currently we cannot find an explanation in the literature for the band we observe given the predicted size of approx. 50kDda according to NP\_056980. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat
