## EB08524 - Goat Anti-BMP5 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** BMP5, bone morphogenetic protein 5, MGC34244

**Official Symbol:** BMP5

**Accession Number(s):** NP\_066551.1

**Human GeneID(s):** [653](#)

### Immunogen

Peptide with sequence C-YKDRSNNRFENET, from the internal region of the protein sequence according to NP\_066551.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:2000.

**Western blot:** Preliminary experiments gave an approx 28kDa band in Human Heart, Prostate and Uterus lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 51.7kDa according to NP\_066551.1. The 28kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human
