EB07197 - Goat Anti-BMPR1A Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: BMPR1A, bone morphogenetic protein receptor, type IA, HGNC:1076, ACVRLK3, ALK3, activin A receptor, type II-like kinase 3

Official Symbol: BMPR1A

Accession Number(s): NP_004320.2

Human GeneID(s): [657](#)

Immunogen

Peptide with sequence C-KSDSDQKKSEN, from the internal region of the protein sequence according to NP_004320.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Approx 60kDa band observed in lysates of cell lines HeLa and HepG2 (calculated MW of 60.2kDa according to NP_004320.2). Recommended concentration: 1-3µg/ml. An additional band of 20kDa was consistently observed, however this band was not blocked by the immunizing peptide and it is therefore a non-specific signal. We call for caution when used for other assays than Western blot.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Dog

EB07197 (1 μ g/ml) staining of HeLa cell lysate (35 μ g protein in RIPA buffer). Primary incubation was 1 hour.
Detected by chemiluminescence.
