EB07197 - Goat Anti-BMPR1A Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: BMPR1A, bone morphogenetic protein receptor, type IA, HGNC:1076,

ACVRLK3, ALK3, activin A receptor, type II-like kinase 3

Official Symbol: BMPR1A

Accession Number(s): NP_004320.2

Human GeneID(s): 657

Immunogen

Peptide with sequence C-KSDSDQKKSEN, from the internal region of the protein sequence according to NP_004320.2.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Approx 60kDa band observed in lysates of cell lines HeLa and HepG2 (calculated MW of 60.2kDa according to NP_004320.2). Recommended concentration: 1-3μg/ml. An additional band of 20kDa was consistently observed, however this band was not blocked by the immunizing peptide and it is therefore a non-specific signal. We call for caution when used for other assays than Western blot.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Dog

EB07197 (1μg/ml) staining of HeLa cell lysate (35μg protein in RIPA buffer). Primary incubation was 1 hour.

Detected by chemiluminescence.
