EB07604 - Goat Anti-C14orf68 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: C14orf68, chromosome 14 open reading frame 68, HDMCP, HMFN1655, hepatocellular carcinoma-downregulated mitochondrial carrier protein Official Symbol: C14orf68 Accession Number(s): NP_997000.2 Human GeneID(s): <u>283600</u>

Immunogen

Peptide with sequence C-RYGNPDAKPTKAD, from the internal region of the protein sequence according to NP_997000.2.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

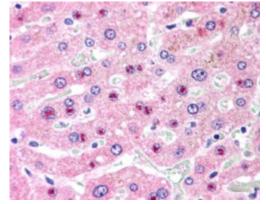

Western blot: Preliminary experiments gave an approx 45kDa band in Human Liver lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 33.4kDa according to NP_997000.2. The 45kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

IHC: In paraffin embedded Human Liver shows staining of nucleoli in select hepatocytes. Recommended concentration, 2.5µg/ml.

Species Reactivity

Tested: Human Expected from sequence similarity: Human

EB07604 (2.5µg/ml) staining of paraffin embedded Human Liver. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
