# EB08981 - Goat Anti-NOA1 Antibody

Size: 100µg specific antibody in 200µl

# **Target Protein**

**Principal Names:** NOA1, nitric oxide associated 1, C4orf14, hAtNOS1, hNOA1, mAtNOS1, nitric oxide associated-1, nitric oxide synthase, mitochondrial (putative), nitric oxide-associated protein 1, putative ortholog of Arabidopsis mitochondrial nitric oxide synthase

Official Symbol: NOA1

Accession Number(s): NP\_115689.1

Human GeneID(s): 84273

Non-Human GenelD(s): 56412 (mouse), 289562 (rat)

## Immunogen

Peptide with sequence ESDYCTAKGSEAIDR, from the internal region of the protein sequence according to NP\_115689.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Preliminary experiments gave an approx 30kDa band in Human Breast and in Breast cancer lysates after 0.5μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 78.5kDa according to NP\_115689.1. The 30kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

## **Species Reactivity**

Tested:

Expected from sequence similarity: Human, Mouse, Rat
